Kalana Kanishka

Data Analysis & MLOps Engineer Internship

Naula, Matale, Sri Lanka | +(94) 760627581 | kanishkakalana8@gmail.com

Portfolio: kalana-kanishka.vercel.app | LinkedIn: kanishkakalana | GitHub: kalanakanishkaa

Professional Summary

High-potential Data Science undergraduate with hands-on expertise in MLOps automation, cloud deployments, and advanced data analytics. Skilled in orchestrating end-to-end machine learning pipelines using Apache Airflow, MLflow, and Docker, alongside cloud microservices deployment on AWS ECS. Adept at transforming complex datasets into actionable business insights through interactive Power BI dashboards and building responsive cross-platform applications.

Technical Skills

Programming & Mobile: Python, Dart (Flutter), SQL (MySQL), JavaScript, HTML5, CSS3, Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, Plotly, PyTorch Geometric, EDA

MLOps & Cloud: Apache Airflow, Docker, AWS (ECS, Fargate), MLflow, DVC, FastAPI, GitHub Actions, Terraform, DagsHub

Databases & Tools: MySQL, MongoDB, Firebase, Supabase, Power BI, MS Excel, Git, GitHub, n8n Automation

Technical Projects

FinShield Guardian: Graph-Based Fraud Risk Assessment (Final Year Project - Ongoing) **March 2026 – Present**

Data Science & ML Developer | *PyTorch Geometric, GNN (GraphSAGE/GAT), GNNExplainer, FastAPI, Docker, Flutter, Supabase*

Initiated a research-backed fraud exposure assessment framework utilizing Graph Neural Networks (GNNs) on IEEE-CIS and PaySim datasets to assess user-level financial risk. Designing an explainable pipeline integrating GNNExplainer with a personalized prevention engine to deliver real-time risk alerts and guidance via a Flutter mobile application.

Customer Churn Prediction MLOps System **Feb 2026 – March 2026**

Lead Developer | *Airflow, MLflow, DVC, FastAPI, Docker, DagsHub, XGBoost*

Orchestrated an automated 6-stage DAG pipeline in Apache Airflow covering data ingestion, validation, feature engineering, model training, evaluation, and registration. Automated model experiment tracking via MLflow and remote dataset versioning using DVC with DagsHub. Built a high-performance REST API using FastAPI for real-time inference and containerized with Docker.

AWS ECS Cloud Deployment Pipeline **Jan 2026 – Feb 2026**

Cloud / DevOps Engineer | *AWS ECS, Docker, Terraform, GitHub Actions, CloudWatch*

Deployed containerized microservices to AWS Elastic Container Service (ECS) utilizing AWS Fargate for serverless scaling. Provisioned infrastructure with Terraform and built automated CI/CD deployment pipelines via GitHub Actions.

E-Commerce Analytics & Customer Satisfaction ML **Nov 2025 – Jan 2026**

Data Analyst | *Python, Scikit-learn, Power BI, EDA, Data Visualization*

Processed and analyzed 5,000+ e-commerce transactional records using Python to uncover consumer behavior trends. Trained a predictive ML model to forecast customer satisfaction scores and designed an interactive 7-visualization Power BI dashboard.

Smart Expense Tracker Mobile Application **Jan 2026 – Present**

Full-Stack Developer | *Flutter, Dart, Local Persistence, State Management*

Developing a cross-platform mobile application for personal financial tracking, dynamic budget allocation, and category-wise expense visualization.

Educational Qualifications

Bachelor of Science (Hons) in Data Science **Expected March 2026**
SLTC Research University

GCE Advanced Level & Ordinary Level **2013 – 2021**
Sri Naga National School
Successfully completed secondary education with a strong technical and IT foundation.
A/L Result (Technology): Engineering Technology (S), Science for Technology (C), ICT (C)

Certifications

Google / **Coursera:** Foundations of User Experience (UX) Design

Google / **Coursera:** Start the UX Design Process: Empathize, Define, and Ideate

Cisco & IBM: Artificial Intelligence Fundamentals

LinkedIn Learning: Learning Data Science | Data Science Foundations: Fundamentals

LinkedIn Learning: Excel Data Visualization: Designing Custom Visualizations
